CASE STUDY

University caterers learn to boost GPs

INVESTIGATION

Catering team of a large university in Southwest England.

Looked to address issues with stock losses and GP tracking.

Lacking visibility on financial performance, they chose Venners.

LEARNINGS

"The Venners team are a great asset for us. Their professionalism and diligence has been second to none."

INFORMATION

Stock movements across campus not recorded

WASTAGE

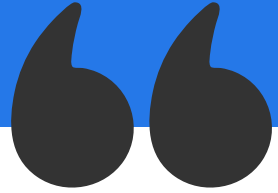

Out-of-date stock found

AWARENESS

Lack of understanding of GPs by key staff members

TECHNOLOGY

Epos system revenue inaccuracies

I would highly recommend Venner's to anyone looking for peace of mind regarding stocktaking and GP clarity. The Venners team are really easy to work with and always on hand if we have any queries.

Senior head chef – Catering division

RESULTS

After a rocky period, our guidance has helped this university

- ☒ Better stock management enabling better profit margins
- ☒ Stockholdings coming in line with management guidelines
- ☒ Reduced waste through better records and tracking
- ☒ Epos system guidance to track revenue effectively
- ☒ Yearend reporting has been made significantly easier
